

I'm excited to share that our class is learning with Zearn Math this school year. Zearn Math is a top-rated math curriculum that personalizes learning for each student. With Zearn Math, your child learns with me and his or her classmates each day, working on activities that build understanding of new concepts and strengthen math foundations. We draw pictures and use real-life objects to represent our math and learn from each other during math discussions. Zearn Math for Kindergarten also includes Digital Activities, which are short and engaging software-based activities designed to develop number sense.

I encourage you to explore Zearn Math with your child. Visit www.zearn.org and enter your child's username and password.
